

AYUSH WARRIER

Product Designer & Frontend Engineer

Mumbai, India | +91 9167709125 | warrierayush@gmail.com | warrierayush.me | linkedin.com/in/ayush-warrier

SUMMARY

I'm a product designer - technically a computer applications graduate, though most of what I do lives on the design side. I like building things and being part of the team from planning, which means getting involved early. I've mostly worked solo or in small teams, which pushes me to wear more hats than my title suggests - at KLYMB, that meant sitting close to product decisions, not just the screens that came after them. Outside of work, I'm usually messing with AI tools, out on a ride, or somewhere I haven't been before.

SKILLS

Design: Product Design · Design Thinking · UX Research · Usability Testing · Wireframing & Prototyping · Information Architecture · Design Systems · Visual Design · Iconography · Typography · Responsive Design · Product Building

Development: HTML · CSS · JavaScript

Tools: Figma · TestFlight · Notion · Google Workspace · Jitter (basic)

EXPERIENCE

Product Designer - KLYMB

Mar 2026 – Present

Founding designer · Fitness & lifestyle mobile app · B2C startup (currently paused while the company seeks funding)

- Sole designer for KLYMB from 0 to 1 - built the entire Figma workspace, a token-based design system (colour, type, spacing, radius, effects, grid), and a custom 200+ icon outline library.
- Designed end-to-end product flows spanning onboarding, activity tracking, nutrition logging, barcode scanning, and challenges, unifying them under one consistent interaction model.
- Partnered directly with founders and the technical lead on product direction, surfacing usability gaps - e.g. a leaderboard that supported friends with no way to actually add them - before they reached implementation.
- Conceptualised the Share Cards feature and reviewed weekly TestFlight builds, logging implementation issues for engineering through to resolution.

Web Designer - Freelance

Nov 2024 – Mar 2025

End-to-end web design for clients

- Redesigned an 11-year-old law firm website into a clearer, modern, fully responsive experience, balancing the firm's established identity with a fresh visual approach.
- Built a complete design system and product screens - landing pages, dashboards, sign-up/login flows - for a blockchain platform, in partnership with RIVANT Media's development team.

UI/UX Design Intern - RIVANT Media

Jun 2024 – Sep 2024

Design & marketing agency

- Designed and shipped the agency's official website from scratch, from wireframes and high-fidelity UI through interactive prototypes and Dev Mode handoff.
- Used Aceternity UI components within Figma to speed up development and keep the build faithful to the design intent, including motion and animation.
- Collaborated with graphic designers on brand identity and a reusable component system for the agency.

SELECTED WORK

ROPAN Yoga Studio - Landing page design within a collaborative brand-identity system (team project)

Live - rivant.in agency website · wojewodka.eu/en law firm redesign · rootelinvestree.com blockchain platform

EDUCATION

Bachelor of Computer Applications - Major in Data Security

2023 – 2026

Symbiosis Institute of Computer Studies and Research (SICSR), Pune · GPA: 7.73 / 10
